About Me

Driven and passionate College Student with a strong interest in Web Development, eager to translate theoretical knowledge into practical experience. Demonstrates a consistent commitment to learning and contributing to the tech industry, striving to deliver high-quality, user-focused solutions. Seeking to leverage skills and grow professionally within a dynamic Web Development environment.

Featured Projects

High-Performance Hackathon Registration Portal 2025-06 - 2025-06

HTML • CSS • JavaScript • Responsive Design

Developed an intuitive and user-friendly hackathon registration platform, enabling over 10,000 participants to securely sign up for events, reducing registration time by 30%. Built with HTML, CSS, and JavaScript for optimal performance and cross-browser compatibility. Implemented responsive design principles to ensure seamless user experience across devices.

AI Interactive Assistant: Enhancing User Productivity 2025-01 - 2025-01

Python • Natural Language Processing (NLP) • Machine Learning • Google Calendar API • Slack API • Trello API

Leveraged Python to develop an AI-powered interactive assistant designed to streamline daily tasks and boost user productivity. Implemented natural language processing (NLP) and machine learning algorithms to provide personalized assistance, resulting in a 30% increase in task completion efficiency. Integrated with popular productivity tools (e.g., Google Calendar, Slack, Trello) to seamlessly coordinate user schedules and tasks, improving overall workflow and organization.
